Our Core Payment Services Include:

- **Credit Cards.** Many consumers carry little or no cash. Credit cards continue to rank as a high consumer preference for payments and Cynergy Data enables acceptance of all the major card types - Visa®, MasterCard®, American Express®, Discover® and JCB®. Let Cynergy Data help facilitate your payments acceptance today.
- **Debit Cards.** With debit payments powered by Cynergy, you can provide your customers with more payment options while delivering the convenience they've come to expect. Plus, debit card acceptance can translate into faster and more secure sales for you with increased protection from chargebacks.

- **Electronic Benefits Cards (EBT).** When customers know you accept EBT, they're more likely to return to your establishment. Plus, because EBT cards function similarly to debit transactions, many of the same terminals that are used to process credit and debit transactions can be used for EBT transactions, eliminating the need to purchase additional processing equipment.
- **Check Services.** Even with today's advanced technology and payment options, some consumers still prefer to write checks. To help safeguard businesses against bad or fraudulent checks, Cynergy Data offers check verification and guarantee services. Through these services, merchants can accept checks with confidence while consumers can continue to utilize what may still be their preferred payment method.
