

Protect Your Business with Cynergy Data's PCI Compliance Program. The Card Associations require that all merchants who process payments adhere to the PCI DSS standards, and submit annual certification of that compliance. And keeping track of ever-evolving PCI requirements can be confusing.

Cynergy Data's Simple PCI Program

Fortunately, Cynergy Data makes it easy for you to comply with all PCI mandates. So you can meet industry regulations, protect your cardholder data and protect your financial resources, all with one simple program.

Just a Few Easy Steps and You're Compliant.

- Simply log in to Vimas, our online merchant account management tool, and complete a self-assessment questionnaire.
- Follow the prompts and within minutes you're on your way to receiving your report on compliance and attesting to your certification.
- Our system will tell you if further steps are needed on your part. If no further steps are needed, your compliance certification will be sent automatically to the Card Associations.

PCI Compliance is Necessary and Important.

Data breaches are costly and can be devastating. To provide added value and protection, Cynergy Data also provides participating and compliant merchants with up to \$10,000 if a breach does occur.
