

Cynergy Data offers a complete range of terminals and peripherals to best suit the needs of your business - from countertop, mobile and wireless solutions to integrated point-of-sale systems and gateways. Listed below are just a few of the payment solutions Cynergy Data offers - but we offer many more. Be sure to check with your Cynergy Data representative for more details on which payment system is right for you.

Countertop

• Dejavoo X5 and X8 Series

The Dejavoo Systems X5 (dial) and X8 (IP) terminals power payments by enabling secure, high-speed transactions coupled with value-added functionality. An integrated, PCI PED approved PIN pad is included, allowing for quick and convenient PIN entry for debit processing.

• Verifone Vx Series

Robust and easy-to-use, the Vx570, Vx510 and Vx510LE terminals provide fast and secure payment authorizations. These terminals include an integrated PIN pad, which reduces countertop clutter and clam shell drop in paper loading - to help eliminate paper jams.

• Hypercom Optimum Family

The T4205, T4210 and T4220 countertop devices combine the best-of-breed features of the Optimum family. These terminals come standard with integrated PCI PED approved PIN pads, for secure PIN entry, and printers to help reduce countertop clutter.

Mobile & Wireless

• AIRCHARGE®

Does your product or service require mobility to service your customers? If so, the AIRCHARGE Mobile Payments Suite is just the ticket. Used in conjunction with the AirBLUE Mini, a card reader and printer all-in-one, the AIRCHARGE payments solution provides real-time authorizations in the field and in the office. And, because transactions are swiped, standard retail rates apply - which translates into lower discount rates than manually keyed transactions. AIRCHARGE is currently compatible with most 8000/9000 series BlackBerry® and Sprint (formerly Nextel) devices and operates with virtually all nationwide cellular networks.

• Verifone Nurit 8020

The Nurit 8020 is a PCI PED-approved, ultra-flexible handheld device that enables fast, secure transactions for on-the-go merchants. This unit supports the GPRS cellular network and includes an easy-to-load thermal printer and built-in PIN Pad with touch screen and electronic signature capture capabilities.

continued...

• **Verifone Vx610**

VeriFone's Vx610 delivers blazing performance, high-end functionality, and exceptional ease of use for mobile based merchants, such as restaurants and home delivery services. The Vx610 is powered by a 32-bit processor for lightning-fast speed coupled with leading wireless technologies, like GPRS, CDMA and Wi-Fi. In addition, this terminal includes an integrated printer and PIN pad.

Integrated Point-of-Sale

• **AccuPOS - Turn Your PC into a Secure, Payment Engine**

Cynergy Data has partnered with AccuPOS, a leading provider of retail and restaurant point-of-sale solutions, to deliver a robust, user-friendly, touch-screen point-of-sale system.

With AccuPOS, you can turn virtually any PC into a payment engine and customize buttons and screens, run detailed transaction reports and much more. And, AccuPOS integrates seamlessly with leading accounting packages, including QuickBooks and Peachtree Accounting.

Gateway Solutions & Software

• **LUCY™ Gateway - Connecting You to the World**

Cynergy Data's proprietary gateway offers reliable, secure and affordable state-of-the-art integrated payment processing services. LUCY allows you to accept virtually every payment type - quickly and securely. And, because the LUCY gateway is Cynergy's proprietary gateway, you receive customer support 24/7.

• **PCCharge™ Software**

VeriFone's PCCharge software is a comprehensive payment solution that turns any PC into a payment-accepting device. PCCharge supports virtually all payments from the leading payment types to stored value, such as gift cards. Through its interactive Graphical User Interface (GUI), users can easily manage customer databases, run complex reports and manage recurring billing with ease.
